

.22 BPCRA Target patterns and Range Suggestions

This shooting sport was designed to use an existing pistol silhouette range with the following distances:

Chickens	50 meters
Pigs	100 meters
Turkeys	150 meters
Rams	200 meters

*It is also permitted to use a range set up in yards instead of meters with the same targets.

Our targets do not conform to any existing NRA Silhouette programs. On some targets the difference is slight, but on Chickens, the size difference is substantial.

This document contains patterns for each of the targets. They may be made from ¼" mild steel for the bodies and feet. There is probably a shop near you that can cut them out for you. The ram pattern is on two sheets, fold over the waste and connect the line to make the complete target.

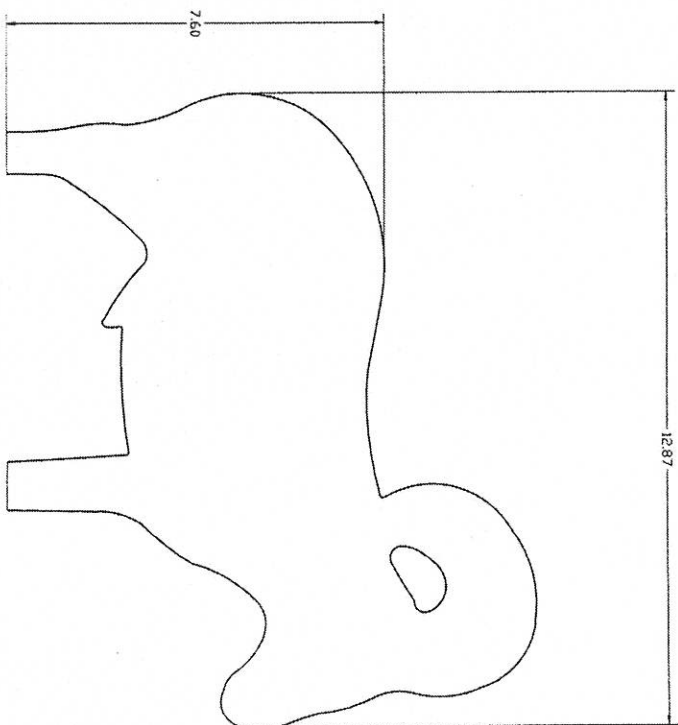

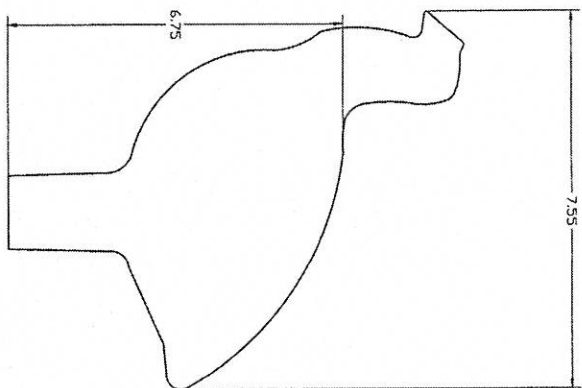

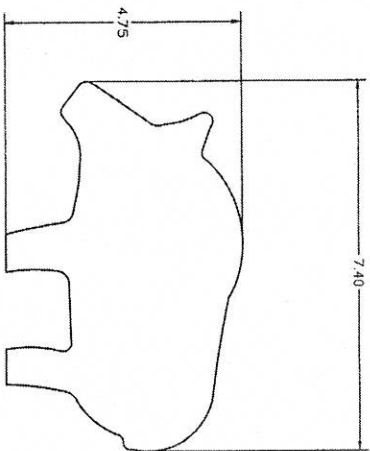

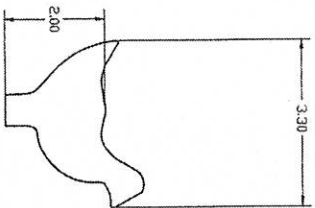

Feet dimensions:

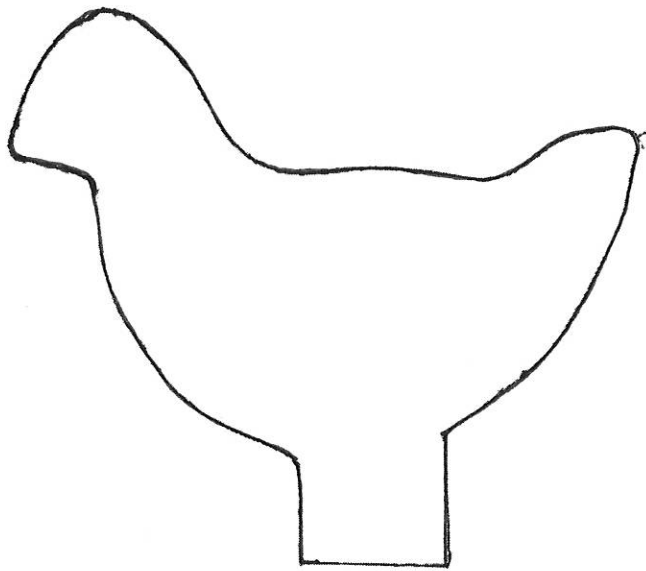

Chickens	1 foot, 1 ½" by 2"
Pigs	1 foot, 1 ½" by 4"
Turkeys	1 foot, 1 ½" by 3"
Rams	2 feet, 1 ½" by 3"

Target Lines:

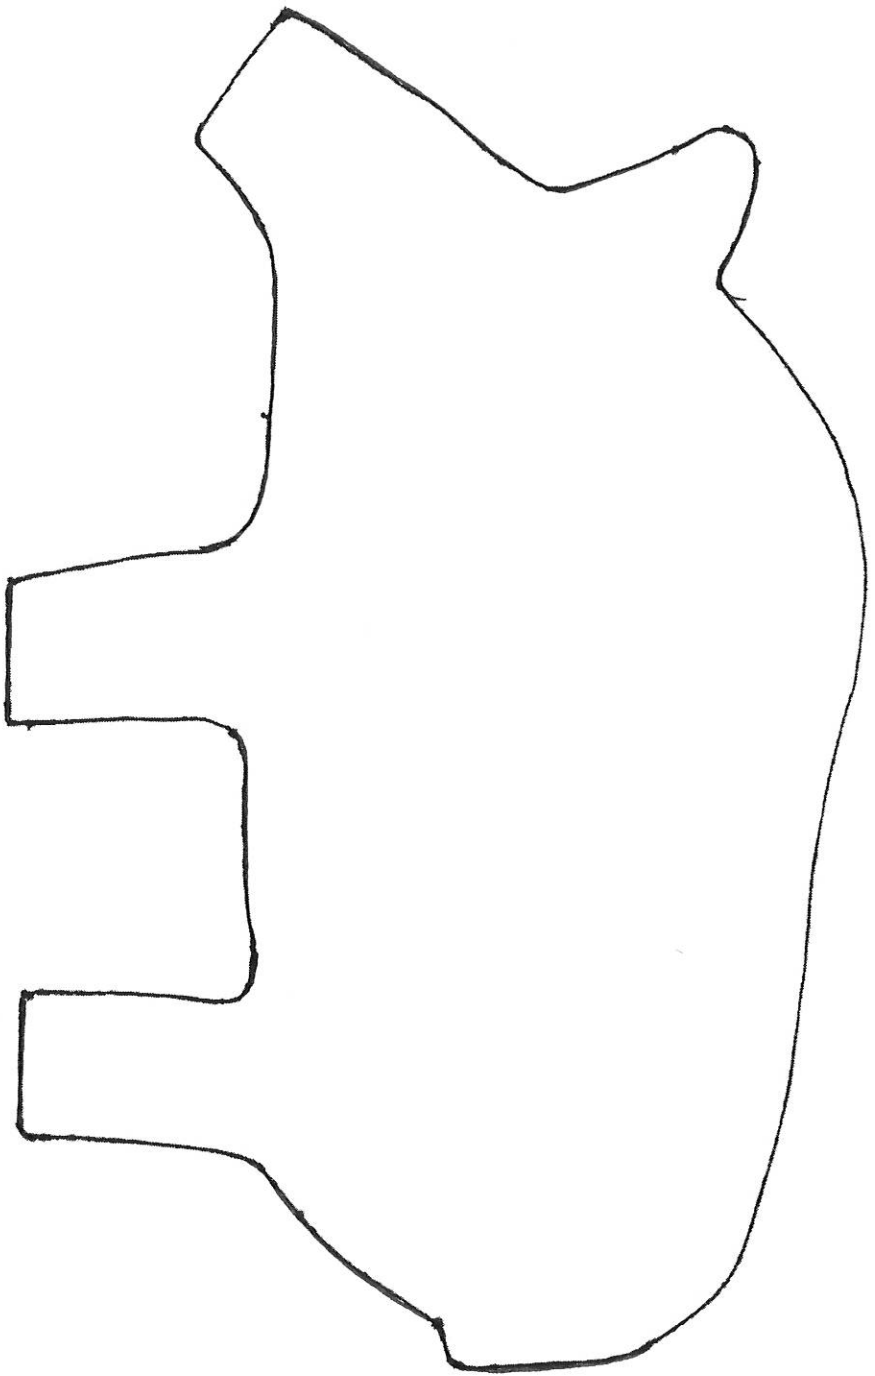

*It is important to have some spacing between each target and each group of 5 targets in order for the shooter to be able to distinguish them with iron sights. Ideally, you want to have 1 ½" as much space between each target as the target is wide. These measurements will provide that amount of separation for a 10 target bank.

Chickens	7-10 feet
Pigs	16-20 feet
Turkeys	16-20 feet
Rams	25-30 feet
